

DirectSense™ IAQ

Indoor Air Quality Meter Brochure

GrayWolf Sensing Solutions of Trumbull, Connecticut has new literature available describing their innovative IAQ monitors which utilize the power of Pocket PC mobile computers.

Display Carbon Dioxide, Carbon Monoxide, %RH and °F/°C, as well as derived moisture readings including Dewpoint and others. Optionally add Ozone, Nitrogen Dioxide, Ammonia or other toxic gas sensors, Particulates, Sound level, Air Velocity and more.

GrayWolf's WolfSense™ application software allows for an easy-to-read real-time display of up to 15 simultaneous measurements, plus "snap-shot" data-logging and long-term trending. Detailed information about each parameter, including sensor basics, and government & industry guidelines are available at the tap of the tactile screen. Industry/application relevant Word, HTML and PDF documents are also included, and users may easily add their own field accessible documents.
