

GrayWolf of Trumbull, CT supplies an Indoor Air Quality (IAQ) probe for HP Jornada Pocket PCs. The IQ-410 probe is designed for commercial and institutional IAQ surveys, as well as general Industrial Hygiene and HVAC applications. The probe connects to the Pocket PC where Carbon Dioxide, Carbon Monoxide, Humidity, Dew Point and Temperature may simultaneously be displayed and data-logged in a choice of unit symbols. GrayWolf's WolfSense™ application software unleashes the power of the HP Jornada to provide a broad range of features including:

- Multiple display modes
- Multiple data-logging modes
- Test site identification
- Auto-linked Notes, Pocket Word™ reports, graphic and audio files
- Detailed tips and application instructions
- Automated calibration history

Other probes are also available for air velocity, toxic gasses, particulates and other measurements
