

DirectSense TOX Brochure

A new brochure detailing a toxic gas monitor that utilizes the power of Pocket PC computers is now available from GrayWolf Sensing Solutions of Trumbull Connecticut and Tuamgraney, Ireland.

Mix or match up to 5 gas sensors (plus temperature) from a choice of Nitrogen Dioxide, Nitric Oxide, Sulfur Dioxide, Hydrogen Sulfide, Hydrogen Cyanide, Ethylene Oxide, Oxygen, Ammonia, Chlorine, Carbon Monoxide and more.

GrayWolf's WolfSense™ application software allows for a clear real-time display of up to 7 simultaneous measurements on a mobile computer, plus instantaneous data-logging and long-term trending. In addition, data file association of text, graphic, audio and calibration notes, as well as Word/Excel templates, results in efficient and detailed documentation of surveys. Sensor tips are available at the tap of the tactile screen, and industry/application relevant documents and web links are also included.

Additional probes are available for thermal comfort and indoor air quality applications.
